

A Listing of Jamaica Post's Services

We have prepared a list indicating the variety of services (by category) showing how we can assist customers. This allows you, the customer, to realise the numerous ways that Jamaica Post provides solutions to your needs. Choose services from our core business focus – mail communications – to supplementary communications involving elements of e-commerce facilitated by information communications technology (ICT).

By infusing ICT in our entire spectrum of offerings, we provide a unique mix of truly useful services that save you time and money. Note that not all postal outlets have every service. Major Post Offices, located in the parish capitals or at major towns, will give a more complete blend of services. This product mix concentration is undertaken for more cost-effectiveness and superior operational logistics: just a 'common sense' approach to placing emphasis where it is most advantageous.

This combination of services creates a business transaction hub to serve you better. Think: in one stop you can do so many things to save you travel time and expense. Visit us soon!
